SUMMARY

Front-end developer with a proven ability to collaborate effectively with team members, ensuring workloads are effectively redirected to areas of constraint and personally picking up the slack when necessary. With a passion for both personal growth and software development, I attended a 1000+ hour coding bootcamp to learn new languages while sharpening existing skills. Ready to apply my passion for coding to a talented engineering team to develop quality solutions.

SKILLS

- JavaScript
- React.js
- HTML
- CSS

- Bootstrap
- Tailwind
- jQuery
- Firebase

- GraphQL
- Git/Github
- Figma
- Netlify

EDUCATION

Mimo Dev Bootcamp   Jan 2023 - Jul 2023

- Completed software programming course with a focus on front-end web development.
- Acquired technical skills and practical experience in building high-quality web applications and user interfaces through group and individual projects.

The Odin Project   Aug 2022 - Dec 2022

- Learned the fundamentals of HTML and CSS to build static websites through hands-on projects.
- Gained experience using Git for version control and engaging in effective coding collaboration on various projects.

PROJECTS

Motion Blurr

- Integrated Firebase for CRUD operations and authentication to securely manage user access.
- Effectively utilized React skills in components, state management, and event handling.
- Developed a Firebase solution for managing data, including storing and retrieving user data.

UniLife Housing

- Built responsive single-page application in React with routing for seamless navigation. experience.
- Utilized conditional rendering and React hooks to asynchronously fetch data from an API.
- Leveraged context API for global state management to display favorite housing selections.

Looking Good Landscaping

- Collaborated with a developer to enhance functionality and optimize user engagement through site redesign.
- The application infrastructure was configured, including hosting, domain setup, and deployment settings, for the live launch of the website.
- Implemented responsive web design and ensured cross-browser compatibility.

Bibliophily

- Drove project development as lead, delegating tasks to each member based on their strengths and areas for growth to maximize productivity.
- Evaluated all pull requests and assessed which code submissions were eligible for integration into the main branch.
- Utilized JavaScript for DOM manipulation to display dynamic data from Google Books API.

WORK EXPERIENCE

Sench Systems   Aug 2023 - Current

- Implemented Agile methodologies to streamline work processes and align with company objectives.
- Enhanced website functionality and security through the development of authentication and error-handling solutions.
- Utilized Firebase for efficient database management, implementing CRUD operations to ensure seamless data handling.

Olive Garden   Jan 2017 - Current

- Achieved a 98% satisfaction rate among guests for over 3 years, ranking #1 in the region.
- Showcased strong organizational skills by coordinating catering setups for a variety of events.

Jcpenney   Oct 2016 - Jan 2017

- Demonstrated strong sales performance by ranking in the store's top 25% for daily credit card sign-ups.
- Fluent in Spanish, enhancing the ability to engage with a diverse customer base and provide exceptional service.
